SUMMARIES

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the posult being printed; and is derived by analysis of the total score distribution.

Esquivel D., Santiago D., Barrera-Saldana H.;
"independent duplication of the growth hormone gene in three
"independent lineages.";
Submitted (APR-2001) to the EMBL/GenBank/DDBJ databases.
PUNCTION: Plays an important role in growth control. Its major role in stimulating hody growth is to stimulate the liver and other tissues to secrete IGF-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulate differentiation and proliferation of myoblasts.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Growth hormone variant precursor (GH-V) (Placenta-specific growth hormone) (Growth hormone 2).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Pan troglodytes (Chimpanzee).

                                                                                                                                                                                                                                                                                       -i- FUNCTION: Plays an important role in growth control. Its main role in stimulating body growth is to stimulate the liver and other tissues to secrete idP-1. It stimulates both the differentiation and proliferation of myobiasis. It also stimulates amino acid uptake and proliferation of myobiasis. It also stimulates amino acid uptake and protein synthesis in muscle and other tissues (By Similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             2 FPTIPLSRIEDNAMIRAHRIBGIAFOTYOEFREAYIPKEGKYSFLQNPOTSISFSESIFT

Chenertlon and intital analysis of more than 15,000 full-length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             "Growth hormone heterogeneity in human pituitary and plasma.";
Horm. Res. 5 Suppl. 12-6(1999).
-!-PUNCTION: Plays an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete 16F-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates action acid uptake and protoin synthesis in muscle and other
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         'issues.
SUBUNIT: Monomer, dimer, trimer, tetramer and pentamer, disulfide-

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Submitted (ACS-2000) to the EMBL/GenBack/HDBJ ditabases.
-!- FUNCTION: Plays an important role in growth control. Its majer role in stimulating body growth is to stimulate the liver and other tissues to secrete IGF-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulate amino acid uptake and protein synthesis in muscle and other
                                                                                                                                                                                                                                                                     Nycticebus pygmaeus (Pygmy słow loris).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Cene 169:209-213(1996).

-: FUNCTION: Plays an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and officer tissues to secrete 16F-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates anno acid uptake and protein synthesis in muscle and other
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     2 FPTIPLSRLEDNAMIRAHRLHQLAFDIYQEFEEAYIPKEQKYSFLQNPQTSLSFSESIPT
